/clone_Torgan: skin; Vector: pOTB7; Site_1: XhoI; Site_2:
/corl; cDNA made by oligo-dT priming. Directionally cloned
into EcoRI; cDNA sites using the following 5' adaptor:
GCCACGAG(G). Size-selected >500bp for average insert size
1.8kb. Library constructed by Ling Hong in the laboratory
of Gerald M. Rubin (University of California, Berkeley)
using ZAP-cDNA synthesis kit (Stratagene) and Superscript
II.RT [Life Technologies). Note: this is a NIH_MGC
                   Library.
                                                                                                                                                                                                                                                                                            /mol_type="mRNA"

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
